

### **Trees By the Shore Program 2010**

Tree Canada and Majesta brand of household paper products are very proud of the success to deliver the Trees By the Shore program this past spring. More than 37,000 trees were planted in 25 communities with the help of community leaders, students, Girl Guides and Scouts, parents and neighbours.

We are looking forward on building the success of the program this coming spring. Communities interested in taking part can log on to [www.majesta.com](http://www.majesta.com) to fill out an application for the Trees By the Shore program in 2010. Will your community help green our nation's shorelines?

### **Focus on Forests**

This fall, Tree Canada, Majesta and the Ontario Forestry Association (OFA) are launching *Focus on Forests*, an on-line national education program *Focus on Forests*, a new bilingual, in-depth guide for teachers about teaching forestry and trees to students. Getting children involved in environmental issues ensures that we protect our forests for years to come. Visit [www.focusonforests.ca](http://www.focusonforests.ca) for more information.

Stay tuned for more information about the Majesta-Irving partnership. We hope you help us green Canada.

## **Trees Do Their Part ... Let's Do Ours!**
